

FINE BONE CHINA (FBC)

- porcelain ecru

Unique and very popular product created especially for Karolina

For many years very popular on the market.

Loved most in such beautiful sets like **Hilma, Greta** or **Claudette.**

Years of experience as the only Polish company with Fine Bone China technology know-how.

No surprise at all cause its production is more difficult that of the standard porcelain.

It really requires **highly advanced techniques** and flexible organization.

Exclusive ivory colour achieved by the chemical reaction that occurs during the firing in 1220°C and the

Impression of

warmth

strikes immediately when touched.
